PROFESSIONAL SUMMARY

BCA student exploring product and customer discovery through Dekho, an early-stage AI-native fintech idea still in problem-identification phase. Has used Jobs-to-Be-Done (JTBD) interviews and market/regulatory research (RBI Account Aggregator framework, DPDP) to test assumptions about real user pain points. Interested in bringing that customer-first, evidence-driven approach to a non-technical growth or product role.

WORK EXPERIENCE & INTERNSHIPS

Dekho — AI-Native Personal Finance Startup (Early Stage), Bengaluru

Apr 2026 – Present

Co-founder

- Applied Jobs-to-Be-Done (JTBD) theory to structure customer discovery, uncovering real user pain points behind expense-tracking behavior.
- Designed a weighted 7-question screening framework to select users for a staged 10→50→100 pilot rollout; currently running with 10–15 active pilot users.
- Researched India's PFM competitive landscape and regulatory environment (RBI Account Aggregator framework, DPDP compliance) to inform product and partnership strategy.

Brown Agri Waste Innovations Pvt. Ltd., Bengaluru

Apr 2025 – May 2025

Web Development Intern

- Built a complete website from scratch using HTML, CSS, and JavaScript, including responsive layouts and interactive UI components.
- Strengthened frontend development and debugging practices through hands-on client project delivery.

PROJECTS

Digital MSME Loan Simulation System | Python, PL/SQL, MySQL

Dec 2025 – Mar 2026

- Simulated an end-to-end MSME loan workflow with borrower and approver roles, implementing application, validation, and approval/rejection logic.
- Created interface to visualize data flow between borrower submissions and approver dashboard, demonstrating how loan applications move through the system.

3D Interactive Website (Philips-Inspired) | HTML, CSS, JavaScript

Dec 2025 – Jan 2026

- Built a prototype exploring 3D interaction and immersive UX with engaging, user-driven navigation.
- Experimented with scroll-triggered animations and CSS transitions to test different visual effects and user engagement patterns.
